Land Use and Employment Survey Information Sheet

October 2017

What is the Land Use and Employment Survey?

The Land Use and Employment Survey (LUES) is a survey of all commercial, industrial, public purpose and recreation open space land uses which generate employment. The survey is conducted within the Perth metropolitan and Peel region and selected regional centres. The LUES attempts to survey every business establishment to collect key information relating to land use and employment, including the type of activities conducted by the businesses, how much floorspace the activity occupies and how many people are employed in each activity. These three main variables are coded according to the Western Australian Standard Land Use Classification (WASLUC) codes and Planning Land Use Categories (PLUC).

The primary purpose of undertaking the LUES is to provide quality information to support the Department of Planning, Lands and Heritage strategic planning process and, in particular, to assist in the review of principles and policies relating to the location and development of specific land use activities. The data collected through the ongoing survey program provides information for use by the Department's planners, government and non-government organisations, academic institutions and the general public.

LUES objectives:

- Provide an accurate assessment of land zoned and/or used for specific purposes.
- Monitor the change in land use, floor space and employment composition in areas of strategic importance.
- Allow for the assessment of the effects of specific uses in non-zoned areas.
- Establish a monitoring system to keep the database up-to-date.
- Provide an accurate and versatile information system as a framework for building sound policies for specific use categories.
- Monitor the use, development and take-up of land and ensure a sufficient supply of appropriately zoned land.
- Provide data as input into population and employment modelling.
- Provide data to other government departments, agencies and instrumentalities, local government, academics and the private sector.

Glossary

Complex

A complex encompasses land having related zoning and activities. A complex has a unique name and number assigned by the Planning Land Use Category (PLUC) database to allow for easy identification.

Development area

A development area is a land parcel on which a development occurs. This generally involves the whole of the lot, and can sometimes comprise several lots or part of a lot. The development area may contain one activity, or a group of activities, related either by establishment or building form.

Employment

The number of employees in this report is measured on-site as defined by the employer. This excludes itinerant workers not attached to an establishment. As previous reports have pointed out, employment numbers from the survey data used in this report may vary from those collected by ABS for the census.

Establishment

A trade name operating as an enterprise in a building. Establishments may contain one or several land uses as defined by WASLUC and occupy more than one floor level. Vacant land, vacant floor space and private residential land uses are specifically excluded from this category.

Full-time employment

Employees who work a full working week as defined by the employer.

Floorspace

The net lettable area which is the area confined within the internal finished surfaces of permanent walls. The net lettable area excludes:

- all stairs, toilets, cleaners' cupboards, life shafts, motor rooms, escalators, tearooms, plant rooms and other service areas
- lobbies adjacent to the lifts or between lifts serving the same floor
- public space not for the exclusive use of occupiers of the building
- areas set aside for the provision of services or facilities not for the exclusive use of occupiers of the building.

Occupied floorspace

Net floorspace exclusive of vacant floorspace.

Part-time employment

Employees who work less than a full working week as defined by the employer.

Planning Land Use Category (PLUC)

Developed by the department to describe groupings of activities that have impacts on the land.

Vacant land

Undeveloped land without improvements.

Vacant floorspace

Floorspace in a site that is vacant.

Western Australian Standard Land Use Classification (WASLUC)

Detailed standardised land use classification based on a description of the land use activity(s) at a particular site. Developed by the Western Australian Government.

Planning Land Use Category (PLUC)

PRI – Primary-Rural

Land use activities which usually involve the use of large areas of land, including mining, agriculture, fishing and nature conservation. The function of many of these activities is to make use of, or extract from, the land in its natural state. Since such activities are the first step in the production process they are quite distinct from the other categories.

MAN – Manufacturing/Processing/Fabrication

This category includes land use activities involving the manufacture, processing and fabrication of all general goods. Both the scale and associated environmental impact of these activities separate them from other land use categories.

STO – Storage/Distribution

Any land use activity which involves the storage, warehousing or wholesaling of goods usually conducted from large structures, or involving large bulk goods, but does not include activities that attract the general retail trade activities.

SER – Service Industry

This category includes service industries offering a range of services. The scale and environmental impact of such activities require their separation from other land uses. These services include film processing, cleaning, motor vehicle and other repair services, and other servicing activities, including some construction activities.

SHP – Shop/Retail

Any activity which involves the sale of goods from a shop located separate to, and/or in, a shopping centre other than those included in Other Retail.

RET – Other Retail

Many of these activities are not normally accommodated in a shopping centre. By virtue of their scale and special nature the goods of these activities separate them from the Shop/Retail category (for example car sales yard or carpet showroom).

OFF – Office/Business

Administrative, clerical, professional and medical offices are activities which do not necessarily require the land area/floor space or exposure of other land uses. Although offices require building and parking facilities, these needs are quite distinct from those of commercial uses and service industries.

HEL – Health/Welfare/Community Services

Government, government-subsidised and non-government activities that provide the community with a specific service, including hospitals, schools, personal services and religious activities.

ENT – Entertainment/Recreation/Cultural

Activities which provide entertainment, recreation and culture for the community and which occur in buildings and/or on land, such as passive and active sports venues, museums, amusements and gambling services.

RES – Residential

Includes all types of residential land use ranging from single housing to nursing homes for the aged, residential hotels, motels, other holiday housing, institutions and religious housing.

UTE – Utilities/Communications

All forms of local, state, national and international communication, transportation and other utilities (for example, electricity, gas, water, sewerage, roads, parking and other transport or communications related activities) covering the public and private sectors.

VFA – Vacant Floor Area

This category accounts for vacant floor areas of buildings, including both non-residential and residential.

VLA – Vacant Land Area

Includes land that has not been improved by development and remains unused.
