

# Rule Change Extension Notice:

## The Relevant Demand calculation (RC\_2019\_01)

This notice of extension is given under clause 2.5.12 of the Market Rules.

<b>Submitter:</b>	Clare Richards	EneIX
<b>Date submitted:</b>	21 June 2019	
<b>Date of extension:</b>	31 December 2022	

In accordance with clause 2.5.10 of the WEM Rules, the Coordinator of Energy (**Coordinator**) has extended the timeframe for the publication of the Draft Rule Change Report for the Rule Change Proposal titled “The Relevant Demand calculation” (RC\_2019\_01) until **5:00 PM on 30 June 2023**.

Dates for subsequent steps of the rule change process have been adjusted accordingly.

### Reason for the Extension

The Coordinator is currently conducting a review of the Reserve Capacity Mechanism (**RCM**)<sup>1</sup> which is expected to (among other things) address the matters considered by RC\_2019\_01.

The RCM Review is expected to be completed by mid- 2023, and the Minister for Energy is expected to subsequently make rule changes to give effect to the outcomes from the review.

Therefore, the Coordinator has extended the timeframe for publication of the Draft Rule Change Report for RC\_2019\_01 until 30 June 2023 to allow adequate time for the completion of the RCM Review.

Further details relating to the Rule Change Proposal are available at <https://www.wa.gov.au/government/document-collections/rule-change-rc201901>.

### Proposed Work Program

- The Coordinator completes the RCM Review.
- The Coordinator presents its draft decision in a Draft Rule Change Report.
- The second submission period takes place.
- The Coordinator presents its final decision in a Final Rule Change Report.
- If approved, any Amending Rules commence.
