

# Generation Mix on 30/01/2023

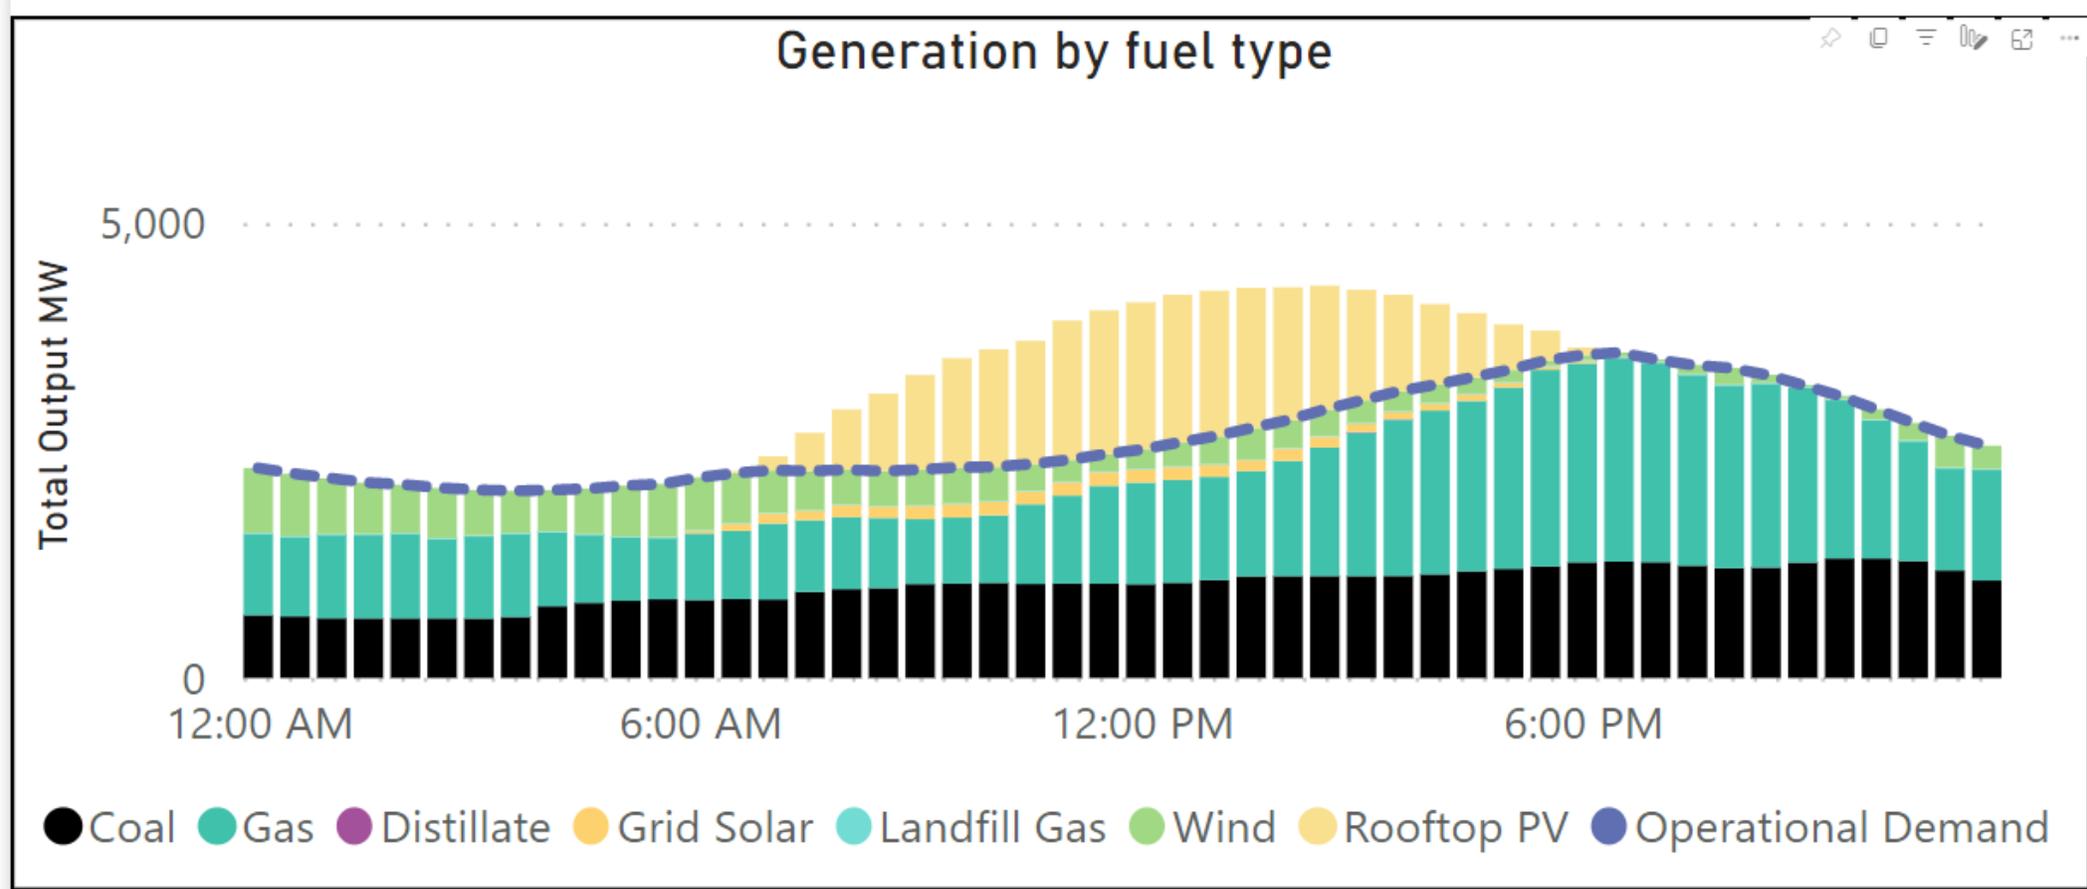

Presentation to the MAC  
meeting on 02/02/2023

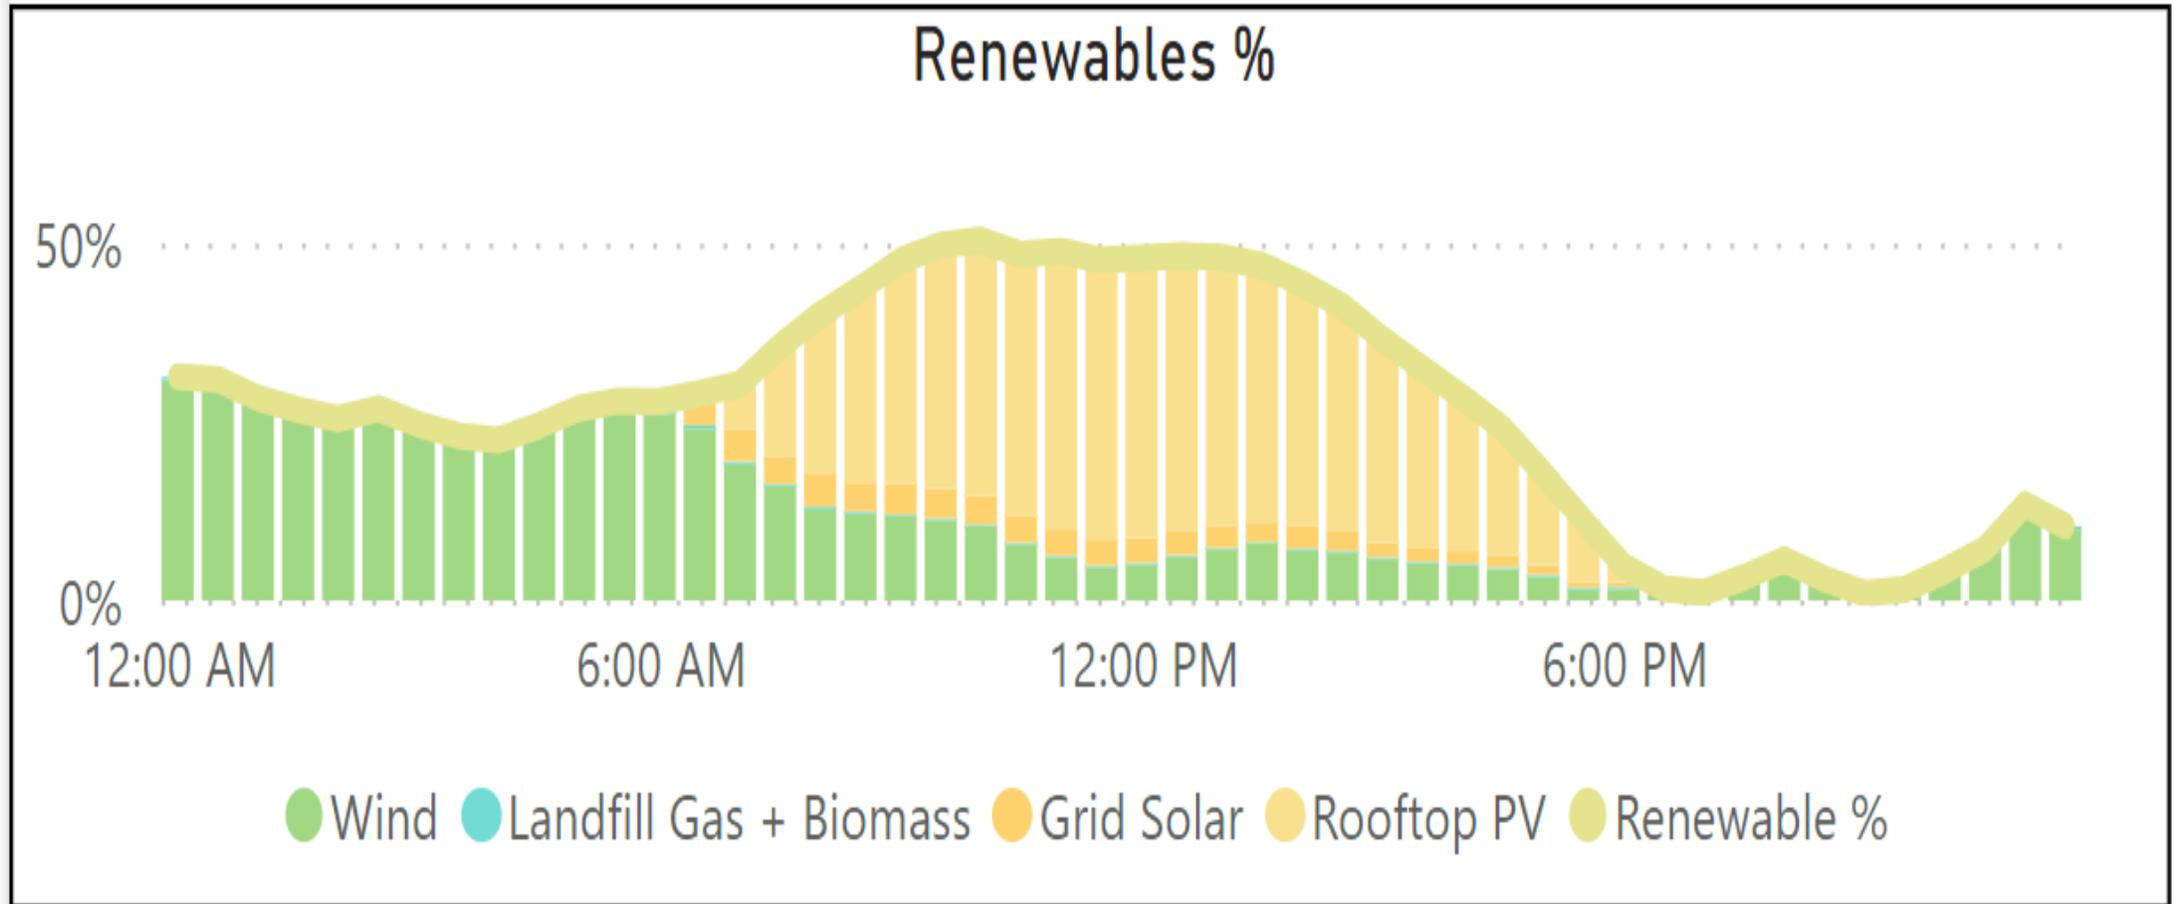

# Some Stats about generation mix on 30/01/2023

- Peak System Demand was 3823 MW;
- For the first time in the history of the SWIS Supplementary Reserve Capacity was called;
- Minimum wind output available for dispatch over the peak was only 28MW

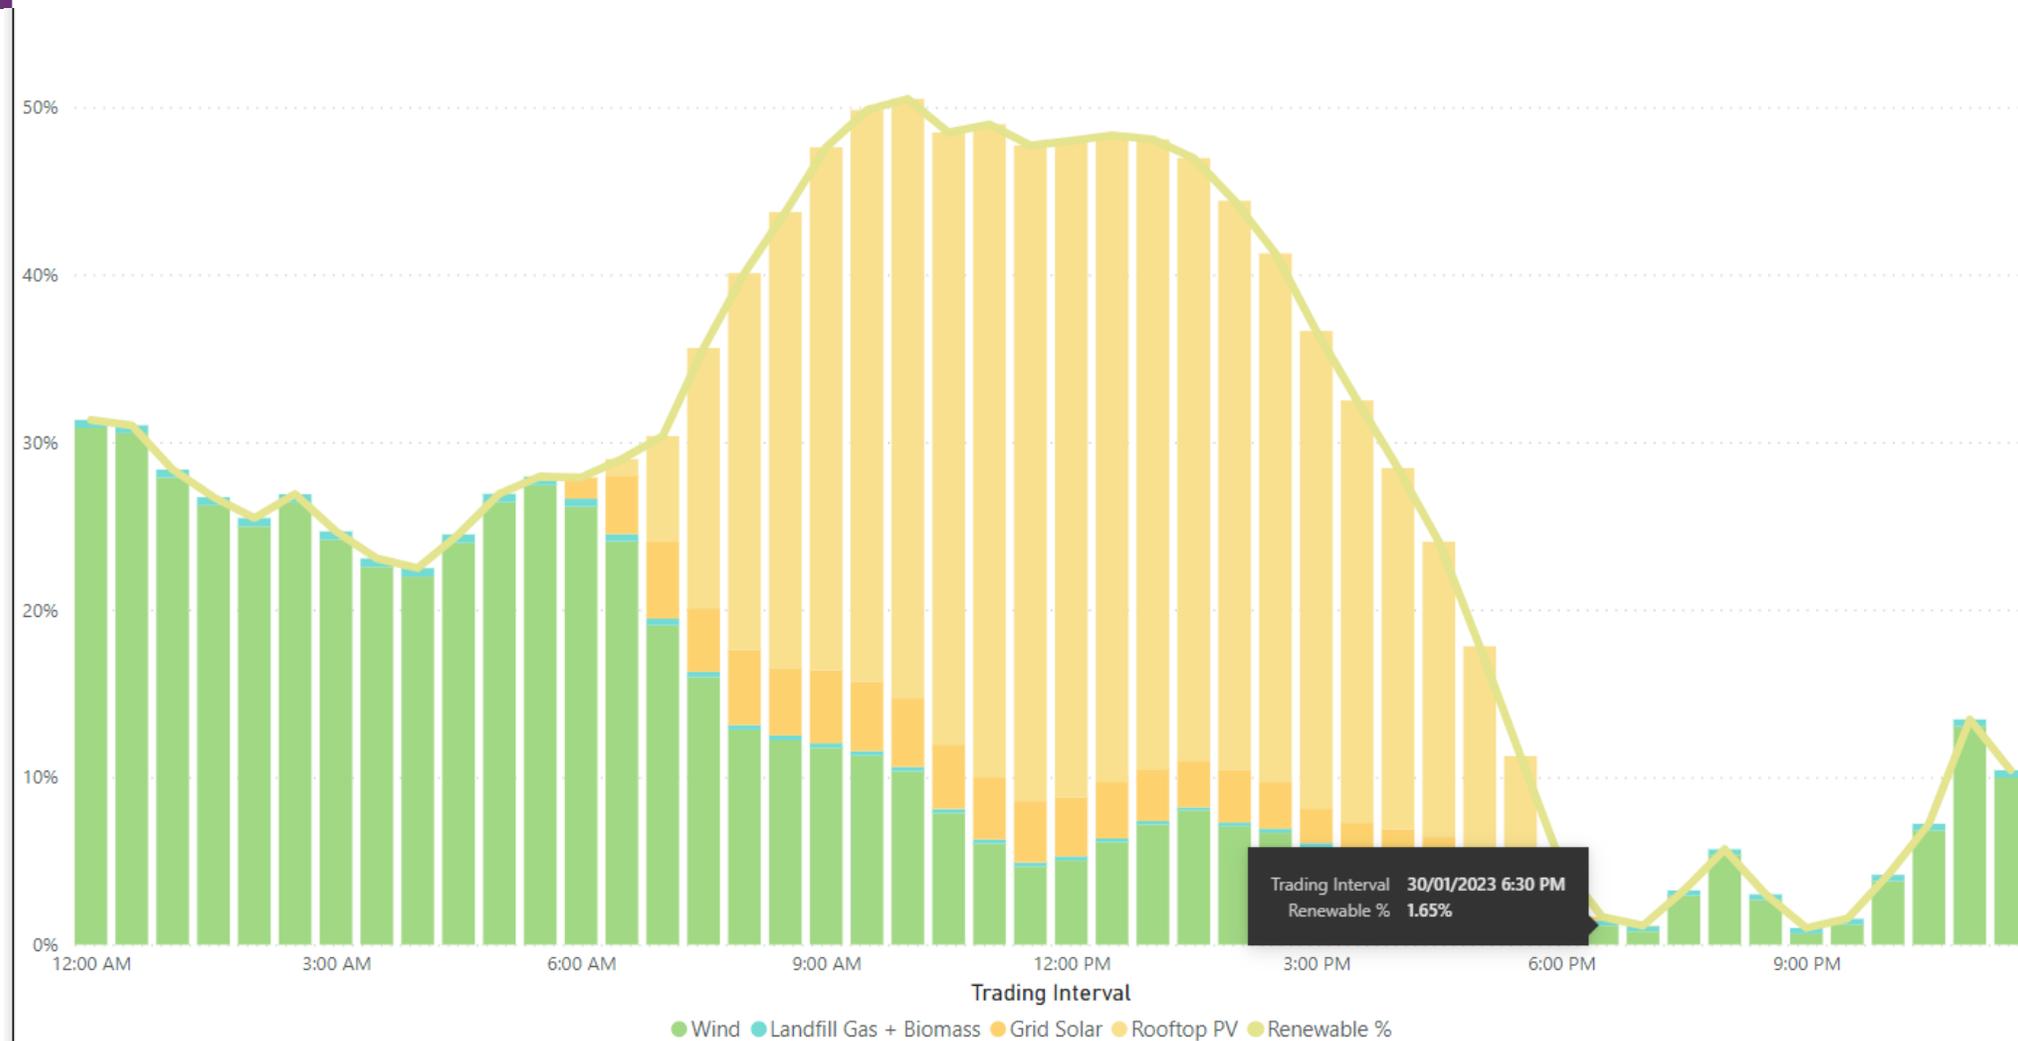

# Contribution of intermittent gen to the peak

# Renewable penetration on 30/01/2023

# Contribution of Intermittent generation at peak
