Dear Energy Policy WA Team,  
Please protect small business by changing a rule, if the shopping centre provide embedded network electricity at higher compare to the business owner purchase the electricity from other electricity provider at a cheaper, the shopping center and lanllord must change at lower price.

Also, we need to put a law there is no profit margin on electricity supply to business owners.

Regards  
Suresh

Dear Suresh

### Voluntary Embedded Networks Code of Practice Case

Submissions to the draft Voluntary Embedded Networks Code of Practice close this Friday, 23 June 2023 at 5.00pm (AWST).

Learnings from the non-binding Voluntary Code will be used to inform potential obligations on embedded network sellers under the upcoming Alternative Electricity Services (AES) framework. The AES framework aims to ensure end-use customers of new and emerging alternative electricity services access to customer protections relevant to the service being provided.

Submissions should be sent to [EPWA-Submissions@dmirs.wa.gov.au](mailto:EPWA-Submissions@dmirs.wa.gov.au).

Please click on the link below to access the Voluntary Code and consultation paper, as well as embedded network business model case studies and the slides and recording of the public forum on the Voluntary Code.
