

Cyber Security Awareness Month

Data Privacy

As **Cyber Security Awareness Month** comes to an end, it's vital to protect our online presence. Let's use lessons from this month to secure our digital privacy. **Stay vigilant and safe online!**

Week 1

Phishing

Be aware of unsolicited emails, and never click on a suspicious link or share personal information.

Week 2

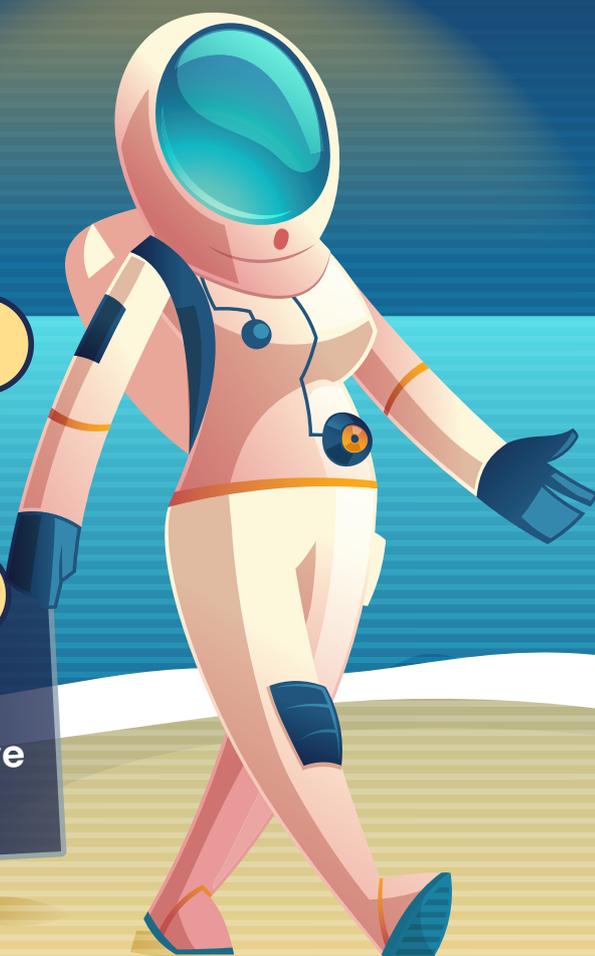

Passphrases

Create strong and unique passphrases for each online account made up of four or more random words.

Week 3

MFA

Double your defence with MFA by using something you know, something you have or something you are wherever possible.

Use strong
passphrases

Don't click on
suspicious links

Lock your
computer

Use two-factor
authentication

Be cautious
with scams
