

BENALTY HOVERCRAFT

MILITARY | PARAMILITARY | BORDER FORCE | COMMERCIAL

Formed in 2011 by its three directors with multiple years experience across the shipbuilding Industry Manufacture, Benalty Corporation Pty Ltd is constantly striving to find innovative solutions for our clientele.

Hovercraft are not meant to replace boats but to complement them. Where boats cannot go, the hovercraft comes into its own travelling from blue water to brown water to land transporting troops and, depending on design, a vehicle.

Australia has a large tidal movement around the northern part from the Pilbara to Cape York Peninsula as is with many other countries.

Hovercraft do not require the same infrastructure as boats such as a jetty or wharf. They can traverse onto land with up to 1:9 gradient depending on the power, speed and weight of the craft.

Shallow water, reefs, marshy or riverine areas with debris are all navigable with a hovercraft.

The 15 meter craft can be designed to fit into a C17 Globemaster for transport to any location to do disaster relief in Australia or a neighboring country.

10% of beaches around the world are accessible by landing barge and 70% of beaches are accessible by hovercraft. Benalty Hovercraft are here to support Defence with a hovercraft designed specifically for the roll required, whether small reconnaissance craft or larger craft to transport vehicles or other heavy equipment.

Benalty are constantly looking for innovative ideas to enhance our craft with stealth capabilities by reducing the noise factor and overall shape.

- Private wholly Australian owned company established 2011.
- Benalty is highly geared in our products as being a "Sovereign Capability" company!
- Specialist in Hovercraft & Ship design, construction, service, maintenance and tech support.
- Hovercraft & Shipbuilding manufacturers; Hovercraft to 40m; Ships to 101m
- Two Western Australian manufacturing facilities.

Benalty operates based on Integrity of customer relationship; we believe this is achieved through:

- Understanding the customer & their business requirements
- Ability to deliver
- Mutual Respect
- Price
- Quality
- On Time Delivery
- Service & Support

Customer centered, operating with integrity to deliver optimal business solutions with innovation for today and vision for the future!
