

COMPANY OVERVIEW

LATCONNECT 60 is a growth stage Earth Observation (EO) technology company based in Perth, Western Australia that generates vital insights from EO data.

LATCONNECT 60 has developed its proprietary EONET60 platform to acquire and process data from a wide range of EO sources, including its own expanding capacity access to high resolution multispectral satellites that we task. It then applies deep industry knowledge, technology development and integration skills to provide responsive, high fidelity, rapid re-visit EO data and insights to enhance commercial, government and defence ISR activities, with Sustainability and Climate Change a key target.

LATCONNECT 60 is already exporting its services into the Indo Pacific region and has a presence in Malaysia.

PRODUCTS

- Post-Processed 50cm resolution multispectral data product, ideal for Defence & Intelligence
- Satellite virtual access and tasking services
- Satellite direct access services
- EONet 60 for processing raw satellite imagery to an analytical ready form
- Development of data analytical tools and models for insights derivation

DISCRIMINATORS

- Exclusivity over Australia & its EEZ (200km border) with global access
- End-user licensing agreement (EULA) is flexible to allow freedom of use in derived and value added products.
- Our new tasking price per sq. km. is on par or cheaper than archive imagery for comparable resolutions from incumbents.
- Able to provide tailored new taskings in regular repeat intervals
- Significant availability of new imagery data to end users well under 24 hours from data capture to delivery.
- Direct Access to other 50cm resolution satellites via regional partners, for multi-satellite direct access

AVAILABILITY AND SUPPORT

- Data products are delivered via API or web based and available globally, supported by our team in Australia.

KEY CUSTOMERS

- Government
- Data resellers
- Commercial

KEY PARTNERSHIPS (SUPPLIERS)

- Surrey Satellite Technology Ltd.
- Curtin University
